

ORDINANCE NO. 584 OF 2017

**BENTLEYVILLE BOROUGH
WASHINGTON COUNTY, PENNSYLVANIA**

**AN ORDINANCE OF BENTLEYVILLE BOROUGH, WASHINGTON
COUNTY, PENNSYLVANIA, PROVIDING FOR THE REGULATION OF
GEOPHYSICAL/SEISMIC TESTING.**

WHEREAS, the use of Geophysical/Seismic Testing in connection with oil and gas exploration and operation activities in Bentleyville Borough has become a potential safety problem and concern for Bentleyville Borough residents.

NOW, THEREFORE, in order to deal with Geophysical/Seismic Testing in connection with oil and gas exploration activities, and in order to provide for the safety of Borough residents, personal property, real property, transportation safety and traffic flow, the Council hereby adopts this Ordinance for the health, safety and welfare of its residents.

Section 1. Title

This Ordinance shall be known as the Bentleyville Borough Geophysical/Seismic Testing Ordinance of 2017.

Section 2. Definitions

“Energy Source Operations.” Operations that involve the creation of seismic waves to model the geophysical properties of the Earth’s crust.

Section 3. Permit required.

It shall be unlawful for any person to conduct any exploration activities within the Borough regarding oil, gas and/or other materials by the use of energy source operations, including without limitation weight drops, explosives and/or vibrating machines, thumper trucks or any other vehicles or equipment that cause vibrations without first obtaining a permit for such from the Borough . To the extent an applicant, pursuant to this Ordinance, seeks to conduct Energy Source Operations on Borough property, including but not limited to Borough roads, highways and real estate. The Council has the express right to grant or deny any application under this ordinance.

Section 4. Permit application; fee procedure.

Application for a permit hereunder shall be made with the Bentleyville Borough Code Enforcement Officer. Such application shall contain the following information: (1) name of the applicant; (2) address of the applicant (3) type of explosives or other geophysical methods of mineral exploration to be used, and the purposes therefore; (4) a map designating a testing area showing the location of all points of use and the energy source to be used at each point; (5) a traffic control plan for any operations or testing that will impede traffic on a public right-of-way;

(6) the location of all wires, cables, accelerometers and other equipment to be placed on the Borough Right-of-Way or properties; and (7) the applicant's insurance information, including the name of applicant's insurance carrier, the types and amount of insurance covering its proposed operations, the name and telephone number of an individual to contact in case of a claim for personal injury or property damage, and the procedure for obtaining a copy of applicant's certificate of insurance. A non-refundable permit fee of Five Hundred and 00/100 (\$500.00) Dollars for processing the application and preparing the permit shall accompany each such application. On receipt of such application, the Code Enforcement Officer or his designee shall forward to the Borough of Council for their review. No permit shall be issued except upon approval of the Borough of Council.

Section 5. Term of permit.

The term of a permit issued under this Ordinance shall be for one (1) year beginning on the date of approval of the permit by the Council, and all energy source operations shall be completed within said term. The applicant shall notify the Code Enforcement Officer and/or his designee a minimum of seven (7) business days in advance of the actual commencement of energy source operations. Once operations have commenced, in the event applicant is rendered unable, wholly or in part, by circumstances beyond the applicant's control, to complete operations within the remaining term of the permit, then the time for completion may be extended, at the sole discretion of the code enforcement office or his designee, for a period of time not to exceed six (6) months, upon written request by the applicant setting forth full particulars of the circumstances causing the delay which were not within the control of the applicant and which the applicant could not have avoided by the exercise of due diligence and care.

Section 6. Operations in general

(a) All geophysical operations shall be limited to the areas determined by the Borough Council, and depicted on the map kept in the Zoning Officer's office. A copy of such map shall be attached to any permit issued by the Borough. If, during the course of operations, any utility line must be relocated to maintain compliance with the terms and conditions set forth herein or to ensure the safety of the general population, the applicant shall notify the Council or his designee at least three (3) business days prior to embarking on such relocation, which shall be performed in compliance with Borough standards.

(b) The applicant shall employ an engineer specializing in seismology, to be approved by the Borough, who shall be on the job-site during the entire period of testing to mitigate any potential damage to public or private property. The applicant shall also designate a point of contact who will respond within twenty-four (24) hours to any request from the code enforcement officer or designee for information regarding the applicant's testing operations, including a request for maps of the testing area that show the points of use as planned by the applicant at the time of the request.

(c) The applicant shall obtain written permission, as required by law, from property owners before entering upon or crossing their property.

(d) The applicant shall be responsible for and shall settle all reasonable and legitimate claims, demands and causes of actions relating to property or persons arising out of or as a result of the applicant's operations under this permit and shall handle all such claims in an expedient manner.

Section 7. Notice required.

(a) The applicant shall notify each owner of property, in writing, by U.S. Mail to or by personal delivery at the property, located within three hundred twenty-five (325) feet of its planned energy source operations, a minimum of ten (10) working days prior to the conducting of any test. Said notice will include the anticipated start date of energy source operations and the energy source planned to be used. The applicant will offer to provide and will provide, if requested, to such owner, in writing, the insurance information required by Section 3 to be included in its application.

(b) The applicant shall notify each owner of property, in writing, by U.S. Mail to or by personal delivery at the property, within four hundred (400) feet of charge tests or two hundred twenty-five (225) feet of vibroseis or weight drop tests, a minimum of ten (10) working days prior to the conducting of any test, of the availability at no costs to the property owner of pre- and post-test inspections of all structures subjected to a peak particle velocity greater than thirty-five-hundredths-inch per second located on or under said property, including appropriate testing an lab test water wells. The applicant shall perform the offered inspections if requested by the property owner. The applicant shall maintain records of such inspections for a period of two (2) years and shall make such records available upon request by the Borough.

(c) The applicant shall place newspaper advertisements in the newspaper of record in the Borough of not less than (3) inches by four (4) inches explaining the work to be performed, the location of the proposed work and a toll-free telephone number where residents may call for more information. Said advertisements shall be placed continuously during the two-week period immediately before the permit application is scheduled to be considered by the Borough Board of Supervisors, and again during the two-week period immediately before the actual operations commence in the testing area. The toll-free telephone number provided by the applicant shall be answered during hours of operation as set forth in Section 5 while work is ongoing in the Borough, and an answering machine shall be installed to receive after-hour calls.

Section 8. Energy level restrictions.

(a) The applicant shall engineer all source locations (explosive charge size and depth, and vibrator source sweep frequency and drive levels or other geophysical sources) so that no structure subject to limitations contained in Subsection 10(d) herein, shall be subject to any peak particle velocity greater than six-tenths-inch per second. No energy source operation shall subject any building intended for human habitation, utility line, water well or underground hazardous waste storage/disposal site to a peak particle velocity greater than five-tenths-inch per second. The applicant shall conduct all the necessary engineering tests on property located within a one-hundred-mile radius from the Borough and containing soils similar to that at the planned locations of the geophysical operations, and shall provide all reports to the Borough in an appropriate format for evaluation at the time of application.

(b) Using industry standard equipment and techniques, the engineer required by Section 5 shall monitor and record, during operations, all pertinent locations to ensure compliance with the maximum peak particle velocity established by Subsection (a). If peak particle velocity for any test exceeds said maximum, the engineer shall notify the Council and cease all operations until corrections are made. The applicant shall maintain all documentation of monitoring activities for a period of at least two (2) years and make said documentation available, upon request, for inspection by the Borough.

(c) The applicant shall obtain location maps for all water wells, underground hazardous waste storage/disposal sites and water, sewer, oil, gas and chemical pipelines located in the testing area and conduct all energy source operations in a manner so as to not damage, interrupt or otherwise interfere with said structures. Information obtained by the applicant by the applicant shall be used by the surveying teams and operations manager to ensure compliance with the terms and conditions of this permit and that safe operating distances are maintained. If requested by the applicant, the Borough shall make available for inspection and copying, maps, if any, prepared by or on behalf of the Borough that indicate subsurface structures or facilities; provided, however, that the applicant's reliance on any information furnished by the Borough, its agents, representatives and employees, whether written or verbal, shall be at the sole risk of the applicant and the following disclaimer shall be placed on and shall apply to any and all such information.

APPLICANT ACKNOWLEDGES THAT THE BOROUGH HAS NOT MADE ANY INDEPENDENT INVESTIGATION OR VERIFICATION OF INFORMATION REGARDING SUBSURFACE STRUCTURES AND FACILITIES FURNISHED TO APPLICANT AND MAKES NO REPRESENTATION OR WARRANTIES AS TO THE ACCURACY OR COMPLETENESS OF SUCH INFORMATION. APPLICANT EXPRESSLY ACKNOWLEDGES THAT THE BOROUGH MAKES NO WARRANTY OR REPRESENTATION, EXPRESSED OR IMPLIED, OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF FITNESS FOR A PARTICULAR USE OR PURPOSE OF SUCH SUBSURFACE INFORMATION.

(d) All Borough owned structures, including but not limited to susceptible underground utilities (water mains, sewer mains, etc.) shall have pre- and post-testing inspections paid for by the applicant if subjected to a peak particle velocity greater than thirty-five-hundredths-inch per second. The Borough shall have the option of receiving reimbursement of its actual cost of performing said inspections or having the inspections done by a third-party firm hired by the applicant. Any reimbursement provided by this Section shall be paid to the Borough within thirty (30) days following the applicant's receipt of an invoice from the Borough.

Section 9. Hours of operation.

Energy source testing may be conducted from 8:00 a.m. until the earlier of sunset or 7:00 p.m. local time, on Mondays through Fridays, and from 9:00 a.m. until the earlier of sunset or 7:00 p.m. local time, on Saturday and Sunday.

Section 10. Lands, streets, rights-of-way and easements.

- (a) The applicant shall restore, at its own cost, Borough owned lands or rights-of-way used in its operations to the original condition just prior to the testing operations, free of damage, including ruts or any injury to landscaping. At its discretion, the Borough may require a road bond or maintenance agreement for road-based testing.
- (b) The applicant shall ensure that its operations will not interfere with the free and safe flow of traffic. When operations are immediately adjacent to the pavement, all equipment shall be parked and/or operated in one (1) lane of traffic.
- (c) The applicant shall notify the code enforcement officer and/or his designee of any equipment to be operated on Borough streets that will exceed the maximum weight limit established by the Borough's engineers, and shall obtain any special permitting required.
- (d) Cables placed on the pavement within rights-of-way must be arranged so they do not create a hazardous condition or rumble strip effect. All cables must be securely anchored to the roadway with materials that will not damage and/or puncture the pavement. Nails, spikes and similar materials used for anchors shall not be placed inside the pavement edge.
- (e) Operations under the permit shall be barred when the code enforcement officer determines that the ground conditions are such that operations would cause ruts deeper than five (5) inches in the rights-of-way or easements. In addition, when ground conditions would cause the tracking of mud, gravel, rock or debris onto the roadway surface of any right-of-way or other Borough improvements in a way that creates a safety hazard or potential for damage to vehicles, operations shall include measures to prevent such hazardous tracking. In the event that hazardous tracking occurs, the applicant shall immediately clean the roadway of all mud, gravel, rock or debris and cease operations until such time as appropriate preventative measures are implemented to ensure that said hazardous tracking does not occur.
- (f) Each testing crew performing work that impedes the flow of traffic such as testing on Borough streets or rights-of-way shall be accompanied by a constable provided by the applicant. The applicant shall furnish, at its cost, adequate signs, barricades, flares, flagmen, etc., as necessary, to protect the traveling public.

Section 11. Testing.

- (a) The applicant shall furnish to the Borough's Council or designee a schedule of each week's test plans. If Thumper Trucks are utilized on Borough Roads, which will require permission of the Borough, the Borough Engineer shall inspect the road before and after testing. Applicant shall pay any and all costs incurred by the Borough as a result of these inspections.
- (b) All vibroseis or weight drop operations shall be conducted a minimum distance of seventy five (75) feet from any building, which shall mean a structure built for the support, shelter or enclosure of persons, chattel or movable property of any kind and which is affixed to the land. No charge test shall be detonated within four hundred (400) feet of any building, water well or underground hazardous waste storage/disposal site. The applicant will provide multiple

monitoring of any charge testing within six hundred (600) feet of any occupied building. Blast Mat or Rock Nets shall be installed on all shot holes prior to blasting. After testing, all holes shall be filled (closed).

(c) The applicant shall maintain and make available upon request by the Borough, for a period of two (2) years, the daily log of energy source tests showing date, location, energy source used, drive level, operator and all other related information including seismic and pre- and post-test survey.

(d) Explosives shall be transported in constantly attended Type-three magazines as defined by section 1902.4.7 of the 1994 Standard Fire Prevention Code. All vehicles transporting explosives will be placarded according to Regulation of Hazardous Materials 49.C.F.R. Only the necessary amount of explosives for each day's operations, during the period as the permit is in effect, shall be transported within the Borough at any given time. No explosives shall be stored within the corporate Borough. If such storage is approved, explosives must be stored in a locked and secure, constantly attended type-two magazine, as defined by section 1902.4.6 of the 1994 Standard Fire Prevention Code, at a single, isolated and sparsely populated location.

(e) The applicant shall notify the Borough's Council, or designee within three (3) business days after the occurrence of any violation of these permit requirements.

Section 12. Bond, insurance and indemnity.

(a) The applicant shall submit to the Borough a Performance Bond in the amount of One Hundred Thousand and 00/100 (\$100,000.00) Dollars from a surety authorized to do business in the state. The Performance Bond shall be valid for a period of two (2) years from the date that the permit is issued. The Bond shall provide, but not be limited to, the following condition: There shall be recoverable by the Borough, jointly and severally, from the principal and surety, any and all damages, loss or costs suffered by the Borough in connection with the applicant's geophysical operations within the Borough. The Bond shall contain the following endorsement: "It is hereby understood and agreed that this bond may not be cancelled by the surety company until sixty (60) days after receipt by the Borough, by registered mail or written notice, of such intent to cancel or not to renew." The rights reserved to the Borough with respect to the Bond are in addition to all other rights of the Borough and no action, proceeding or exercise of a right with respect to such Bond shall affect any other rights of the Borough.

(b) Prior to conducting any operations hereunder, the applicant and/or its contractors shall furnish a certificate of insurance to the Borough showing the Borough as an "additional insured" with respect to operations conducted within the Borough and showing liability insurance coverage covering commercial, personal injury and general liability in amounts not less than One Million (\$1,000,000.00) Dollars per person, Three Million (\$3,000,000.00) Dollars per occurrence, and One Million (\$1,000,000.00) Dollars property damage.

(c) The applicant shall protect, indemnify, defend and hold the Borough, its officers, employees, agents and representatives harmless from and against all claims demands and causes of action of every kind and character for injury to or death of any person or persons, damages, liabilities, losses and/or expenses occurring or in any way incident to, arising out of, or in

connection with it or its contractors', agents' or representatives' operations under this permit, under this permit, including attorneys' fees and any other costs and inspections incurred by the Borough in defending against any such claims, demands and causes of action. Within thirty (30) days of receipt of the same, the applicant shall notify the Borough, in writing, of each claim for injuries, death or persons or damages or losses to property or in any way incident to, arising out of or in connection with its or its contractors', agents' or representatives' operations conducted under this permit. At the Borough's discretion, the Borough may conduct an independent investigation, monitor and review the processing of any such claim to ensure that such claim is handled as required herein.

(d) Any permit granted hereunder may be revoked upon breach of any term or condition contained herein.

(e) Notwithstanding anything contained herein to the contrary, any permit granted hereunder shall not be effective unless and until a copy of the permit, signed by an authorized officer of the applicant, the Performance Bond and the certificates of insurance have been filed with the Borough Secretary.

Section 13. Penalties.

A person who knowingly violates any provision of this Ordinance shall be deemed guilty of a misdemeanor and, upon conviction, shall be fined in an amount not to exceed One Thousand and 00/100 (\$1,000.00) Dollars. Each day of the violation shall constitute a separate offense.

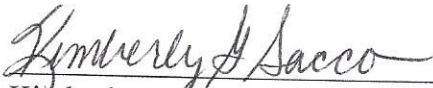

Section 14. Effective Date.

This ordinance shall take effect immediately upon passage.

Section 15. Construction of Ordinance.

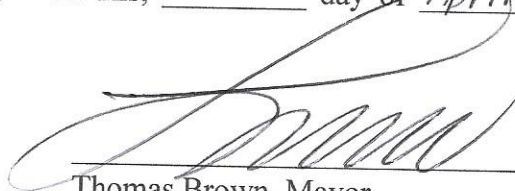

The enactment and existence of this ordinance shall not be construed as creating any right or entitlement whatsoever in any individual, group or business entity to perform operations on Borough property or any other property, private or public. Furthermore, this ordinance shall not be construed as conferring the legal right to perform energy source operations as described herein on private property, and the issuance of a permit pursuant to this ordinance does not concomitantly confer any right to perform energy source operations on such property. This ordinance neither expands nor limits the requirements for energy source operations on private property, but, rather, leaves applicable law regarding the same intact. This ordinance shall not be construed as rendering on behalf of the Borough any statement, assertion, warranty or guarantee concerning the scope, methods and/or safety of any individual, group or entity permitted by the Board of Council under this ordinance. Accordingly, the Borough shall not, as a result of any decision to grant or deny any permit under this ordinance, be held liable for any harm directly or indirectly related to any operations performed in the Borough.

ORDAINED AND ENACTED this 4 day of April, 2017.
